SUBJECT INDEX VOLUME 108

Acanthamoeba
myosin head tail junction localization 1783
Acetylated
microtubule preimplantation embryo 543
Acetylation
histone Tetrahymena 1577
Acetylcholine
receptor alpha subunit mRNA 1823
receptor cDNA Torpedo cloning 2277
receptor clustering spectrin 481
receptor degrdn neuromuscular junction 647
receptor formation muscle cell 1817
receptor gene muscle denervation 1523
receptor protein formation nonmuscle 1833
Acetylcholinesterase
form electrocyte Torpedo 2301
Acetyltransferase
choline neuron ciliary neurotropic factor 1807
Acid
secretion stomach membrane cytoskeleton 441
vacuole Dictyostelium 865
Acidification
cytoplasm clathrin lattice morphol 401
cytoplasm endocytosis exocytosis 377
endosome hydrogen transport 1291
lysosome CHO mutant 2211
Acrosome
reaction glycoprotein ZP3 receptor aggregation 2163
Actin
barbed end capping protein radixin 2369
F synapsin I interaction 1841
interaction domain gelsolin 1717
microfilament assocn gelsolin 467
microfilament microvillus core intestine 495
nerve growth cone 95
organization stomach acid secretion 441
Actinin
isoform muscle dystrophin 503
Acylation
fatty GAP43 protein neuron 613
Acyltransferase
cholesterol CHO cell selection 2201
Adaptin
protein cDNA sequence mouse 833
Adherens
junction cell radixin 2369
junction sepn biochem liver 31
Adhesion
cell integrin protein kinase C 1925
cell tenascin arginylglycylaspartate receptor 1149
erythrocyte malaria band 3 protein 23
neural cell mol expression 1909
plaque myofibril assembly heart 2355
platelet membrane glycoprotein VLA2 collagen 1917
spreading laminin domain cell correction 2547
uvomorulin tumor invasiveness 2435
Adhesive
mol formation fibroblast muscle denervation 1873
Adipocyte
differentiation tumor necrosis factor 1105
glucose transporter insulin 1537
Adligin
microtubule protein nematode 955
Adrenal
cortex protein kinase C cytoskeleton 553
Agrin
neuromuscular junction development 1527
Alanine
glyoxylate aminotransferase rerouting hyperoxaluria 1 1345
Albumin
phytohemagglutinin chimeric gene transgenic tobacco 327
Aminopeptidase
dipeptidyl gene sequence Saccharomyces 1363
N conformation enterocyte membrane 2193
Aminotransferase
rerouting peroxisome mitochondria hyperoxaluria 1 1345
Amnion
angiogenesis fibroblast factor proteinase 671
Amoeboid
sperm nematode Ascaris suum cytoskeleton 55
Amphibian
fertilization protein kinase C 885
Angiogenesis
amnion fibroblast factor proteinase 671
Ankyrin
ATPase fodrin complex epithelium 893
fodrin ATPase interaction kidney membrane 455
Antibody
fibronectin receptor subunit peptide 2529
kinesin assocn organelle 1453
monoclonal tyrosine kinase substrate 2401
transforming growth factor histochem 653
Antigen
carcinoembryonic mRNA splicing human 267
histocompatibility endocytosis phorbol ester pathway 1317
LFA1 lymphoma invasion metastasis 1979
very late 2 platelet collagen 1917
Antiserum
actinin isoform muscle 503
Antitumor
arginine glycine aspartate peptide correction 2547
Aorta
extracellular matrix proteoglycan formation 2495
Apical
protein delivery intestine epithelium microtubule 13
Arginine
glycine aspartate peptide antitumor correction 2547
Arginylglycylaspartate
receptor tenascin cell attachment 1149
Arthritis
rheumatoid heat collagenase stromelysin mRNA 2037
Ascaris
suum nematode cytoskeleton amoeboid sperm 55
Ascorbate
cholinoceptor subunit mRNA muscle 1823
Asialoglycoprotein
receptor endocytosis liver 2137
Aspartate
arginine glycine peptide antitumor correction 2547
Assembly
endoplasmic reticulum docking protein mechanism 797
ATP
protein precursor membrane receptor translocation 2101
ATPase
ankyrin fodrin complex epithelium 893
ankyrin fodrin interaction kidney membrane 455
Dictyostelium 865

Contents:

Volume 108, Number 1, January 1989

1 **Mapping replicational sites in the eucaryotic cell nucleus.** H. Nakayasu and R. Berezney

13 **Nocodazole, a microtubule-active drug, interferes with apical protein delivery in cultured intestinal epithelial cells (Caco-2).** U. Eilers, J. Klumperman, and H.-P. Hauri

23 **Characterization of a modified red cell membrane protein expressed on erythrocytes infected with the human malaria parasite *Plasmodium falciparum*. Possible role as a cytoadherent mediating protein.** E. Winograd and I. W. Sherman

31 **Isolation of cell-to-cell adherens junctions from rat liver.** S. Tsukita and S. Tsukita

43 **Immunocytochemical studies of cardiac myofibrillogenesis in early chick embryos. III. Generation of fasciae adherentes and costameres.** K. T. Tokuyasu

55 **A unique cytoskeleton associated with crawling in the amoeboid sperm of the Nematode, *Ascaris suum*.** S. Sepsenwol, H. Ris, and T. M. Roberts

67 **Phosphorylation of vimentin in mitotically selected cells. In vitro cyclic AMP-independent kinase and calcium-stimulated phosphatase activities.** R. M. Evans

79 **Primary structure of the brain α-spectrin.** V.-M. Wasenius, M. Saraste, P. Salvén, M. Erämaa, L. Holm, V.-P. Lehto

95 **The organization of myosin and actin in rapid frozen nerve growth cones.** P. C. Bridgman and M. E. Dailey

111 **The cytoskeletal architecture of the presynaptic terminal and molecular structure of synapsin 1.** N. Hirokawa, K. Sobue, K. Kanda, A. Harada, and H. Yorifuji

127 **Asynchronous assembly of the acetylcholine receptor and of the 43-kD v_1 protein in the postsynaptic membrane of developing *Torpedo marmorata* electrocyte.** E. Kordeli, J. Cartaud, H.-O. Nghiêm, A. Devillers-Thiéry, and J.-P. Changeux

141 **Analysis of the calcium-modulated proteins, S100 and calmodulin, and their target proteins during C6 glioma cell differentiation.** D. B. Zimmer and L. J. Van Eldik

153 **Activity and regulation of calcium-, phospholipid-dependent protein kinase in differentiating chick myogenic cells.** S. Adamo, C. Caporale, C. Nervi, R. Ceci, and M. Molinaro

159 **Growth factors, signaling pathways, and the regulation of proliferation and differentiation in BC3H1 muscle cells. I. A pertussis toxin–sensitive pathway is involved.** D. J. Kelvin, G. Simard, H. H. Tai, T. P. Yamaguchi, and J. A. Connolly

169 **Growth factors, signaling pathways, and the regulation of proliferation and differentiation in BC3H1 muscle cells. II. Two signaling pathways distinguished by pertussis toxin and a potential role for the *ras* oncogene.** D. J. Kelvin, G. Simard, A. Sue-A-Quan, and J. A. Connolly

177 **An insulin epidermal growth factor–binding protein from *Drosophila* has insulin-degrading activity.** J. V. Garcia, M. P. Stoppelli, S. J. Decker, and M. R. Rosner

183 **Integrin phosphorylation is modulated during the differentiation of F-9 teratocarcinoma stem cells.** S. C. Dahl and L. B. Grabel

191 **Cartilage contains mixed fibrils of collagen types II, IX, and XI.** M. Mendler, S. G. Eich-Bender, L. Vaughan, K. H. Winterhalter, and P. Bruckner

199 **Activation of the cell wall degrading protease, lysin, during sexual signalling in *Chlamydomonas*: the enzyme is stored as an inactive, higher relative molecular mass precursor in the periplasm.** M. J. Buchanan, S. H. Imam, W. A. Eskue, and W. J. Snell

209 **Acknowledgment**

Volume 108, Number 2, February 1989

Mini-Reviews

223 **The transport and assembly of the axonal cytoskeleton.** P. J. Hollenbeck

229 **The scanning model for translation: an update.** M. Kozak

Regular Articles

243 **Essential roles for the RNA polymerase I largest subunit and DNA topoisomerases in the formation of fission yeast nucleolus.** T. Hirano, G. Konoha, T. Toda, and M. Yanagida

255 **Interconversion of *Drosophila* nuclear lamin isoforms during oogenesis, early embryogenesis, and upon entry of cultured cells into mitosis.** D. E. Smith and P. A. Fisher

267 **Carcinoembryonic antigens: alternative splicing accounts for the multiple mRNAs that code for novel members of the carcinoembryonic antigen family.** T. R. Barnett, A. Kretschmer, D. A. Austen, S. J. Goebel, J. T. Hart, J. J. Elting, and M. E. Kamarck

277 **The dynamic nature of the Golgi complex.** G. Griffiths, S. D. Fuller, R. Back, M. Hollinshead, S. Pfeiffer, and K. Simons

299 **Access of proteinase K to partially translocated nascent polypeptides in intact and detergent-solubilized membranes.** T. Connolly, P. Collins, and R. Gilmore

309 **Processing pathway for protease B of *Saccharomyces cerevisiae*.** C. M. Moehle, C. K. Dixon, and E. W. Jones

327 **Transport of the proteins to the plant vacuole is not by bulk flow through the secretory system, and requires positive sorting information.** C. Dorel, T. A. Voelker, E. M. Herman, M. J. Chrispeels

339 **Isolation of Chinese hamster ovary cell lines temperature conditional for the cell-surface expression of integral membrane glycoproteins.** J. Hearing, E. Hunter, L. Rodgers, M.-J. Gething, and J. Sambrook

355 **Addition of truncated oligosaccharides to influenza virus hemagglutinin results in its temperature-conditional cell-surface expression.** J. Hearing, M.-J. Gething, and J. Sambrook

367 **Identification of rat testis galactosyl receptor using antibodies to liver asialoglycoprotein receptor: purification and localization on surfaces of spermatogenic cells and sperm.** M. Abdullah and A. L. Kierszenbaum

377 **Low cytoplasmic pH inhibits endocytosis and transport from the *trans*-Golgi network to the cell surface.** P. Cosson, I. de Curtis, J. Pouysségur, G. Griffiths, and J. Davoust

389 **Hypertonic media inhibit receptor-mediated endocytosis by blocking clathrin-coated pit formation.** J. E. Heuser and R. G. W. Anderson

401 **Effects of cytoplasmic acidification on clathrin lattice morphology.** J. Heuser

413 **Cell cycle–dependent association of HSP70 with specific cellular proteins.** K. L. Milarski, W. J. Welch, and R. I. Morimoto

425 **The intracellular location of yeast heat-shock protein 26 varies with metabolism.** J. M. Rossi and S. Lindquist

441 **Membrane-cytoskeleton dynamics in rat parietal cells: mobilization of actin and spectrin upon stimulation of gastric acid secretion.** F. Mercier, H. Reggio, G. Devilliers, D. Bataille, and P. Mangeat

455 **Ankyrin links fodrin to the alpha subunit of Na,K-ATPase in Madin–Darby canine kidney cells and in intact renal tubule cells.** J. S. Morrow, C. D. Cianci, T. Ardito, A. S. Mann, and M. Kashgarian

467 **Association of gelsolin with actin filaments and cell membranes of macrophages and platelets.** J. H. Hartwig, K. A. Chambers, and T. P. Stossel

481 **An unusual β-spectrin associated with clustered acetylcholine receptors.** R. J. Bloch and J. S. Morrow

495 **Reassociation of microvillar core proteins: making a microvillar core in vitro.** L. M. Coluccio and A. Bretscher

503 **Detection of a specific isoform of alpha-actinin with antisera directed against dystrophin.** E. P. Hoffman, S. C. Watkins, H. S. Slayter, and L. M. Kunkel

511 **Effect of Ca^{2+} on the dimeric structure of scallop sarcoplasmic reticulum.** L. Castellani, P. M. D. Hardwicke, and C. Franzini-Armstrong

521 **Characterization of the gene for mp20: a *Drosophila* muscle protein that is not found in asynchronous oscillatory flight muscle.** A. Ayme-Southgate, P. Lasko, C. French, and M. L. Pardue

533 **Distribution of fast myosin heavy chain isoforms in thick filaments of developing chicken pectoral muscle.** L. D. Taylor and E. Bandman

543 **Posttranslational modification of distinct microtubule subpopulations during cell polarization and differentiation in the mouse preimplantation embryo.** E. Houliston and B. Maro

553 **Isolation and characterization of protein kinase C from Y-1 adrenal cell cytoskeleton.** V. Papadopoulos and P. F. Hall

569 **Isolation of a new member of the S100 protein family: amino acid sequence, tissue, and subcellular distribution.** J. R. Glenney, Jr., M. S. Kindy, and L. Zokas

579 **Expression of NF-L and NF-M in fibroblasts reveals coassembly of neurofilament and vimentin subunits.** M. J. Monteiro and D. W. Cleveland

595 **Antisera directed against connexin43 peptides react with a 43-kD protein localized to gap junctions in myocardium and other tissues.** E. C. Beyer, J. Kistler, D. L. Paul, and D. A. Goodenough

607 **Cerebellar granule cells contain a membrane mitogen for cultured Schwann cells.** P. W. Mason, J. W. Bigbee, and G. H. DeVries

613 **Posttranslational membrane attachment and dynamic fatty acylation of a neuronal growth cone protein, GAP-43.** J. H. P. Skene and I. Virág

625 **Expression of cytotactin in the normal and regenerating neuromuscular system.** J. K. Daniloff, K. L. Crossin, M. Pinçon-Raymond, M. Murawsky, F. Rieger, and G. M. Edelman

637 **Identification of a novel nicotinic acetylcholine receptor structural subunit expressed in goldfish retina.** K. Cauley, B. W. Agranoff, and D. Goldman

647 **Degradation rate of acetylcholine receptors inserted into denervated vertebrate neuromuscular junctions.** S.-L. Shyng and M. M. Salpeter

653 **Transforming growth factor-β1: histochemical localization with antibodies to different epitopes.** K. C. Flanders, N. L. Thompson, D. S. Cissel, E. Van Obberghen-Schilling, C. C. Baker, M. E. Kass, L. R. Ellingsworth, A. B. Roberts, and M. B. Sporn

661 **Expression of transforming growth factor-β1 in specific cells and tissues of adult and neonatal mice.** N. L. Thompson, K. C. Flanders, J. M. Smith, L. R. Ellingsworth, A. B. Roberts, and M. B. Sporn

671 **In vitro angiogenesis on the human amniotic membrane: requirement for basic fibroblast growth factor–induced proteinases.** P. Mignatti, R. Tsuboi, E. Robbins, and D. B. Rifkin

683 **Dissociation of inositol triphosphate from diacylglycerol production in Rous sarcoma virus–transformed fibroblasts.** T. J. Martins, Y. Sugimoto, and R. L. Erikson

693 **Regulation of urokinase receptor in monocytelike U937 cells by phorbol ester phorbol myristate acetate.** R. Picone, E. L. Kajtaniak, L. S. Nielsen, N. Behrendt, M. R. Mastronicola, M. V. Cubellis, M. P. Stoppelli, S. Pedersen, K. Danø, and F. Blasi

703 **Primary structure of leukocyte function–associated molecule-1 α subunit: an integrin with an embedded domain defining a protein superfamily.** R. S. Larson, A. L. Corbi, L. Berman, and T. Springer

713 **Transcriptional regulation of osteopontin production in rat osteoblast-like cells by parathyroid hormone.** M. Noda and G. Rodan

719 **Thrombospondin is an osteoblast-derived component of mineralized extracellular matrix.** P. Gehron Robey, M. F. Young, L. W. Fisher, and T. D. McClain

729 **Complete thrombospondin mRNA sequence includes potential regulatory sites in the 3′ untranslated region.** S. W. Hennessy, B. A. Frazier, D. D. Kim, T. L. Deckwerth, D. M. Baumgartel, P. Rotwein, and W. A. Frazier

737 **Procyclin gene expression and loss of the variant surface glycoprotein during differentiation of *Trypanosoma brucei*.** I. Roditi, H. Schwarz, T. W. Pearson, R. P. Beecroft, M. K. Liu, J. P. Richardson, H.-J. Bühring, J. Pleiss, R. Bülow, R. O. Williams, and P. Overath

747 **Correction**

Volume 108, Number 3, March 1989

755 **The level of Z-DNA in metabolically active, permeabilized mammalian cell nuclei is regulated by torsional strain.** B. Wittig, T. Dorbic, and A. Rich

765 **Autonomous splicing and complementation of in vivo–assembled spliceosomes.** S. Zeitlin, R. C. Wilson, and A. Efstratiadis

779 **The XLR gene product defines a novel set of proteins stabilized in the nucleus by zinc ions.** H.-J. Garchon and M. M. Davis

789 **Nascent secretory chain binding and translocation are distinct processes: differentiation by chemical alkylation.** C. V. Nicchitta and G. Blobel

797 **Evidence for a two-step mechanism involved in assembly of functional signal recognition particle receptor.** D. W. Andrews, L. Lauffer, P. Walter, and V. R. Lingappa

811 **Selective retention of monoglucosylated high mannose oligosaccharides by a class of mutant vesicular stomatitis virus G proteins.** K. Suh, J. E. Bergmann, and C. A. Gabel

821 **Differential extractability of influenza virus hemagglutinin during intracellular transport in polarized epithelial cells and nonpolar fibroblasts.** J. E. Skibbens, M. G. Roth, and K. S. Matlin

833 **Cloning of cDNAs encoding two related 100-kD coated vesicle proteins (α-adaptins).** M. S. Robinson

843 **Formation of coated vesicles from coated pits in broken A431 cells.** E. Smythe, M. Pypaert, J. Lucocq, and G. Warren

855 **Changes in lysosome shape and distribution correlated with changes in cytoplasmic pH.** J. Heuser

865 **Prelysosomal acidic vacuoles in *Dictyostelium discoideum*.** H. Padh, M. Lavasa, and T. L. Steck

875 **Localization of phycoerythrin at the lumenal surface of the thylakoid membrane in *Rhodomonas lens*.** M. Ludwig and S. P. Gibbs

885 **Activators of protein kinase C trigger cortical granule exocytosis, cortical contraction, and cleavage furrow formation in *Xenopus laevis* oocytes and eggs.** W. M. Bement and D. G. Capco

893 **A membrane–cytoskeletal complex containing Na^+, K^+-ATPase, ankyrin, and fodrin in Madin–Darby canine kidney (MDCK) cells: implications for the biogenesis of epithelial cell polarity.** W. J. Nelson and R. W. Hammerton

903 **Type I collagen gel induces Madin–Darby canine kidney cells to become fusiform in shape and lose apical–basal polarity.** A. Zuk, K. S. Matlin, and E. D. Hay

921 **Rapid phosphorylation and reorganization of ezrin and spectrin accompany morphological changes induced in A-431 cells by epidermal growth factor.** A. Bretscher

931 **Asymmetric behavior of severed microtubule ends after ultraviolet–microbeam irradiation of individual microtubules in vitro.** R. A. Walker, S. Inoué, and E. D. Salmon

939 **Microtubule dynamics investigated by microinjection of *Paramecium* axonemal tubulin: lack of nucleation but proximal assembly of microtubules at the kinetochore during prometaphase.** G. Geuens, A. M. Hill, N. Levilliers, A. Adoutte, and M. De Brabander

955 **The isolation and in situ location of adligin: the microtubule cross-linking protein from *Caenorhabditus elegans*.** E. Aamodt, R. Holmgren, and J. Culotti

965 **Differential axonal transport of isotubulins in the motor axons of the rat sciatic nerve.** P. Denoulet, G. Filliatreau, B. de Nechaud, F. Gros, and L. Di Giamberardino

973 **Quantitative analysis of cell motility and chemotaxis in *Dictyostelium discoideum* by using an image processing system and a novel chemotaxis chamber providing stationary chemical gradients.** P. R. Fisher, R. Merkl, and G. Gerisch

985 **A *Dictyostelium* mutant deficient in severin, an F-actin fragmenting protein, shows normal motility and chemotaxis.** E. André, M. Brink, G. Gerisch, G. Isenberg, A. Noegel, M. Schleicher, J. E. Segall, and E. Wallraff

997 **Concurrent collapse of keratin filaments, aggregation of organelles, and inhibition of protein synthesis during the heat shock response in mammary epithelial cells.** T.-T. Shyy, B. B. Asch, and H. L. Asch

1009 **Transgenic expression of the muscle-specific intermediate filament protein desmin in nonmuscle cells.** F. R. Pieper, G. Schaart, P. J. Krimpenfort, J. B. Henderik, H. J. Moshage, A. van de Kemp, F. C. Ramaekers, A. Berns, and H. Bloemendal

1025 **Localization of nicotinic acetylcholine receptor α-subunit transcripts during myogenesis and motor endplate development in the chick.** B. Fontaine and J.-P. Changeux

1039 **Comparative characterization of the 21-kD and 26-kD gap junction proteins in murine liver and cultured hepatocytes.** O. Traub, J. Look, R. Dermietzel, F. Brümmer, D. Hülser, and K. Willecke

1053 **The actions of retinoids on cellular growth correlate with their actions on gap junctional communication.** P. P. Mehta, J. S. Bertram, and W. R. Loewenstein

1067 **Growth and partial differentiation of presumptive human cardiac myoblasts in culture.** D. S. Kohtz, N. R. Discher, T. Inagami, and B. Goldman

1079 **Differential response of myofibrillar and cytoskeletal proteins in cells treated with phorbol myristate acetate.** Z. Lin, J. Eshleman, C. Grund, D. A. Fischman, T. Masaki, W. W. Franke, and H. Holtzer

1093 **The N-*myc* proto-oncogene and IGF-II growth factor mRNAs are expressed by distinct cells in human fetal kidney and brain.** H. Hirvonen, M. Sandberg, H. Kalimo, V. Hukkanen, E. Vuorio, T. Salmi, and K. Alitalo

1105 **Modulation of adipocyte differentiation by tumor necrosis factor and transforming growth factor beta.** F. M. Torti, S. V. Torti, J. W. Larrick, and G. M. Ringold

1115 **Nerve growth factor–induced changes in the intracellular localization of the protein kinase C substrate B-50 in pheochromocytoma PC12 cells.** C. O. M. Van Hooff, J. C. M. Holthuis, A. B. Oestreicher, J. Boonstra, P. N. E. De Graan, and W. H. Gispen

1127 **New mammary epithelial and fibroblastic cell clones in coculture form structures competent to differentiate functionally.** E. Reichmann, R. Ball, B. Groner, and R. R. Friis

1139 **A tumor-associated fibronectin isoform generated by alternative splicing of messenger RNA precursors.** B. Carnemolla, E. Balza, A. Siri, and L. Zardi

1149 **Tenascin mediates cell attachment through an RGD-dependent receptor.** M. A. Bourdon and E. Ruoslahti

1157 **Perineurial cells coexpress genes encoding interstitial collagens and basement membrane zone components.** S. Jaakkola, J. Peltonen, and J. J. Uitto

1165 **Membrane-associated chondroitin sulfate proteoglycans of human lung fibroblasts.** G. David, V. Lories, A. Heremans, B. Van Der Schueren, J.-J. Cassiman, and H. Van Den Berghe

1177 **Correction**

1179 **Correction**

1181 **Correction**

1184 **Placement Service Notices**

Volume 108, Number 4, April 1989

1187 **Intestinal epithelial differentiation: new insights from chimeric and transgenic mice.** J. I. Gordon

1195 **Higher order chromosome structure is affected by cold-sensitive mutations in a *Schizosaccharomyces pombe* gene *crm1*$^+$ which encodes a 115-kD protein preferentially localized in the nucleus and at its periphery.** Y. Adachi and M. Yanagida

1209 **Kinetochore structure: electron spectroscopic imaging of the kinetochore.** J. B. Rattner and D. P. Bazett-Jones

1221 **Induction and characterization of mitochondrial DNA mutants in *Chlamydomonas reinhardtii*.** R. F. Matagne, M.-R. Michel-Wolvertz, C. Munaut, C. Duyckaerts, and F. Sluse

1227 **A tripartite structure of the signals that determine protein insertion into the endoplasmic reticulum membrane.** M.-T. Haeuptle, N. Flint, N. M. Gough, and B. Dobberstein

1237 **NH_2-Terminal substitutions of basic amino acids induce translocation across the microsomal membrane and glycosylation of rabbit cytochrome P450IIC2.** E. Szczesna-Skorupa and B. Kemper

1245 **Calcium and GTP: essential components in vesicular trafficking between the endoplasmic reticulum and Golgi apparatus.** C. J. M. Beckers and W. E. Balch

1257 **Reconstitution of the Golgi apparatus after microinjection of rat liver Golgi fragments into *Xenopus* oocytes.** J. Paiement, M. Jolicoeur, A. Fazel, and J. J. M. Bergeron

1271 **The *Saccharomyces cerevisiae SEC14* gene encodes a cytosolic factor that is required for transport of secretory proteins from the yeast Golgi complex.** V. A. Bankaitis, D. E. Malehorn, S. D. Emr, and R. Greene

1283 **Differing polarity of the constitutive and regulated secretory pathways for von Willebrand factor in endothelial cells.** L. A. Sporn, V. J. Marder, and D. D. Wagner

1291 **Acidification of endosome subpopulations in wild-type Chinese hamster ovary cells and temperature-sensitive acidification-defective mutants.** S. Schmid, R. Fuchs, M. Kielian, A. Helenius, and I. Mellman

1301 **Characterization of the early endosome and putative endocytic carrier vesicles in vivo and with an assay of vesicle fusion in vitro.** J. Gruenberg, G. Griffiths, and K. E. Howell

1317 **Endocytosis of the class I major histocompatibility antigen via a phorbol myristate acetate–inducible pathway is a lymphocyte-specific phenomenon and requires the cytoplasmic domain.** G. G. Capps, M. Van Kampen, C. L. Ward, and M. C. Zúñiga

1331 **Endocytosis from coated pits of shiga toxin: a glycolipid-binding protein from *Shigella dysenteriae* 1.** K. Sandvig, S. Olsnes, J. E. Brown, O. W. Petersen, and B. van Deurs

1345 **An enzyme trafficking defect in two patients with primary hyperoxaluria type 1: peroxisomal alanine/glyoxylate aminotransferase rerouted to mitochondria.** C. J. Danpure, P. J. Cooper, P. J. Wise, and P. R. Jennings

1353 **Subcellular localization of sterol carrier protein-2 in rat hepatocytes: its primary localization to peroxisomes.** G. A. Keller, T. J. Scallen, D. Clarke, P. A. Maher, S. K. Krisans, and S. J. Singer

1363 **Structure, biosynthesis, and localization of dipeptidyl aminopeptidase B, an integral membrane glycoprotein of the yeast vacuole.** C. J. Roberts, G. Pohlig, J. H. Rothman, and T. H. Stevens

1375 **Erythrocyte morphology reflects the transbilayer distribution of incorporated phospholipids.** D. L. Daleke and W. H. Huestis

1387 **Analysis of the signal for attachment of a glycophospholipid membrane anchor.** I. W. Caras, G. N. Weddell, and S. R. Williams

1397 **Lateral distribution and diffusion of plastocyanin in chloroplast thylakoids.** W. Haehnel, R. Ratajczak, and H. Robenek

1407 **Development of tight junctions de novo in the mouse early embryo: control of assembly of the tight junction–specific protein, ZO-1.** T. P. Fleming, J. McConnell, M. H. Johnson, and B. R. Stevenson

1419 **The *SPA2* protein of yeast localizes to sites of cell growth.** M. Snyder

1431 **The role of cyclin B in meiosis I.** J. M. Westendorf, K. I. Swenson, and J. V. Ruderman

1445 **Microtubule polarities indicate that nucleation and capture of microtubules occurs at cell surfaces in *Drosophila*.** M. M. Mogensen, J. B. Tucker, and H. Stebbings

1453 **Monoclonal antibodies to kinesin heavy and light chains stain vesicle-like structures, but not microtubules, in cultured cells.** K. K. Pfister, M. C. Wagner, D. L. Stenoien, S. T. Brady, and G. S. Bloom

1465 **Periodic organization of the contractile apparatus in smooth muscle revealed by the motion of dense bodies in single cells.** G. J. Kargacin, P. H. Cooke, S. B. Abramson, and F. S. Fay

1477 **Expression of mutant keratin cDNAs in epithelial cells reveals possible mechanisms for initiation and assembly of intermediate filaments.** K. Albers and E. Fuchs

1495 **Assembly and exchange of intermediate filament proteins of neurons: neurofilaments are dynamic structures.** K. J. Angelides, K. E. Smith, and M. Takeda

1507 **Experimental observations on the development of polarity by hippocampal neurons in culture.** K. Goslin and G. Banker

1517 **Visualization of cyclic nucleotide binding sites in the vertebrate retina by fluorescence microscopy.** A. Caretta and H. Saibil

1523 **Skeletal muscle denervation activates acetylcholine receptor genes.** H.-J. Tsay and J. Schmidt

1527 **Agrin-related molecules are concentrated at acetylcholine receptor clusters in normal and aneural developing muscle.** J. R. Fallon and C. E. Gelfman

1537 **Localization of transferrin receptors and insulin-like growth factor II receptors in vesicles from 3T3-L1 adipocytes that contain intracellular glucose transporters.** L. I. Tanner and G. E. Lienhard

1547 **Molecular cloning of syndecan, an integral membrane proteoglycan.** S. Saunders, M. Jalkanen, S. O'Farrell, and M. Bernfield

1557 **The hyaluronate receptor is preferentially expressed on proliferating epithelial cells.** A. M. Alho and C. B. Underhill

1567 **The incubation of laminin, collagen IV, and heparan sulfate proteoglycan at 35°C yields basement membrane–like structures.** D. S. Grant, C. P. Leblond, H. K. Kleinman, S. Inoue, and J. R. Hassell

---

Volume 108, Number 5, May 1989

1577 **Antibodies specific to acetylated histones document the existence of deposition- and transcription-related histone acetylation in *Tetrahymena*.** R. Lin, J. W. Leone, R. G. Cook, and C. D. Allis

1589 **Binding of an *N*-ethylmaleimide–sensitive fusion protein to Golgi membranes requires both a soluble protein and an integral membrane receptor.** P. J. Weidman, P. Melançon, M. R. Block, and J. E. Rothman

1597 **Endolyn-78, a membrane glycoprotein present in morphologically diverse components of the endosomal and lysosomal compartments: implications for lysosome biogenesis.** E. Croze, I. E. Ivanov, G. Kreibich, M. Adesnik, D. D. Sabatini, and M. G. Rosenfeld

1615 **Coat proteins isolated from clathrin coated vesicles can assemble into coated pits.** D. T. Mahaffey, M. S. Moore, F. M. Brodsky, and R. G. W. Anderson

1625 **The intracellular transport of low density lipoprotein–derived cholesterol is defective in Niemann-Pick type C fibroblasts.** L. Liscum, R. M. Ruggiero, and J. R. Faust

1637 **In vitro membrane assembly of a polytopic, transmembrane protein results in an enzymatically active conformation.** B. Ahrem, H. K. Hoffschulte, and M. Müller

1647 **The propeptide of preprosomatostatin mediates intracellular transport and secretion of α-globin from mammalian cells.** T. J. Stoller and D. Shields

1657 **A conserved tripeptide sorts proteins to peroxisomes.** S. J. Gould, G.-A. Keller, N. Hosken, J. Wilkinson, and S. Subramani

1665 **Chitin synthase 1, an auxiliary enzyme for chitin synthesis in *Saccharomyces cerevisiae*.** E. Cabib, A. Sburlati, B. Bowers, and S. J. Silverman

1673 **Binding and transepithelial transport of immunoglobulins by intestinal M cells: demonstration using monoclonal IgA antibodies against enteric viral proteins.** R. Weltzin, P. Lucia-Jandris, P. Michetti, B. N. Fields, J. P. Kraehenbuhl, and M. R. Neutra

1687 **Developmental regulation of cryptdin, a corticostatin/defensin precursor mRNA in mouse small intestinal crypt epithelium.** A. J. Ouellette, R. M. Greco, M. James, D. Frederick, J. Naftilan, and J. T. Fallon

1697 ***Drosophila* spectrin: the membrane skeleton during embryogenesis.** T. C. Pesacreta, T. J. Byers, R. Dubreuil, D. P. Kiehart, and D. Branton

1711 **Flexural rigidity of marginal bands isolated from erythrocytes of the newt.** R. E. Waugh and G. Erwin

1717 **Identification of critical functional and regulatory domains in gelsolin.** D. J. Kwiatkowski, P. A. Janmey, and H. L. Yin

1727 **Evidence for active interactions between microfilaments and microtubules in myxomycete flagellates.** T. Q. P. Uyeda and M. Furuya

1737 **Organization of cytoskeletal elements and organelles preceding growth cone emergence from an identified neuron in situ.** F. Lefcort and D. Bentley

1751 **Centrin-mediated microtubule severing during flagellar excision in *Chlamydomonas reinhardtii*.** M. A. Sanders and J. L. Salisbury

1761 **Three-dimensional reconstruction of the Z disk of sectioned bee flight muscle.** N. Cheng and J. F. Deatherage

1775 **Arrangement of filaments and cross-links in the bee flight muscle Z disk by image analysis of oblique sections.** J. F. Deatherage, N. Cheng, and B. Bullard

1783 **Location of the head–tail junction of myosin.** D. L. Rimm, J. H. Sinard, and T. D. Pollard

1791 **Molecular genetic characterization of a developmentally regulated human perinatal myosin heavy chain.** R. Feghali and L. A. Leinwand

1799 **The expression of sarcomeric muscle-specific contractile protein genes in BC3H1 cells: BC3H1 cells resemble skeletal myoblasts that are defective for commitment to terminal differentiation.** M. B. Taubman, C. W. J. Smith, S. Izumo, J. W. Grant, T. Endo, A. Andreadis, and B. Nadal-Ginard

1807 **Ciliary neurotrophic factor induces cholinergic differentiation of rat sympathetic neurons in culture.** S. Saadat, M. Sendtner, and H. Rohrer

1817 **Regulation of acetylcholine receptor synthesis at the level of translation in rat primary muscle cells.** O. Horovitz, V. Spitsberg, and M. M. Salpeter

1823 **Acetylcholine receptor α-subunit mRNA is increased by ascorbic acid in cloned L_5 muscle cells: Northern blot analysis and in situ hybridization.** O. Horovitz, D. Knaack, T. R. Podleski, and M. M. Salpeter

1833 **The mammalian 43-kD acetylcholine receptor–associated protein (RAPsyn) is expressed in some non-muscle cells.** L. S. Musil, D. E. Frail, and J. P. Merlie

1841 **Characterization of synapsin I fragments produced by cysteine-specific cleavage: a study of their interactions with F-actin.** M. Bähler, F. Benfenati, F. Valtorta, A. J. Czernik, and P. Greengard

1851 **Electrostatic and hydrophobic interactions of synapsin I and synapsin I fragments with phospholipid bilayers.** F. Benfenati, P. Greengard, J. Brunner, and M. Bähler

1863 **Interactions of synapsin I with small synaptic vesicles: distinct sites in synapsin I bind to vesicle phospholipids and vesicle proteins.** F. Benfenati, M. Bähler, R. Jahn, and P. Greengard

1873 **Fibroblasts that proliferate near denervated synaptic sites in skeletal muscle synthesize the adhesive molecules tenascin (J1), N-CAM, fibronectin, and a heparan sulfate proteoglycan.** C. L. Gatchalian, M. Schachner, and J. R. Sanes

1891 **Membrane anchoring of heparan sulfate proteoglycans by phosphatidylinositol and kinetics of synthesis of peripheral and detergent-solubilized proteoglycans in Schwann cells.** D. J. Carey and D. M. Evans

1899 **Immunoelectron microscopic localization of hyaluronic acid–binding region and link protein epitopes in brain.** J. A. Ripellino, R. U. Margolis, and R. K. Margolis

1909 **Neural cell adhesion molecule expression is regulated by Schwann cell–neuron interactions in culture.** B. Seilheimer, E. Persohn, and M. Schachner

1917 **The membrane glycoprotein Ia–IIa (VLA-2) complex mediates the Mg^{++}-dependent adhesion of platelets to collagen.** W. D. Staatz, S. M. Rajpara, E. A. Wayner, W. G. Carter, and S. A. Santoro

1925 **Phorbol ester modulation of integrin-mediated cell adhesion: a postreceptor event.** Y. N. Danilov and R. L. Juliano

1935 **A novel member of the integrin receptor family mediates ARG-GLY-ASP–stimulated neutrophil phagocytosis.** H. D. Gresham, J. L. Goodwin, P. M. Allen, D. C. Anderson, and E. J. Brown

1945 **Syndecan and tenascin expression is induced by epithelial–mesenchymal interactions in embryonic tooth mesenchyme.** S. Vainio, M. Jalkanen, and I. Thesleff

1955 **RGD-dependent linkage between plant cell wall and plasma membrane: consequences for growth.** M. Schindler, S. Meiners, and D. A. Cheresh

1967 **A family of abundant plasma membrane–associated glycoproteins related to the arabinogalactan proteins is unique to flowering plants.** R. I. Pennell, J. P. Knox, G. N. Scofield, R. R. Selvendran, and K. Roberts

1979 **Involvement of LFA-1 in lymphoma invasion and metastasis demonstrated with LFA-1–deficient mutants.** F. F. Roossien, D. de Rijk, A. Bikker, and E. Roos

1987 **Activation of pro-urokinase and plasminogen on human sarcoma cells: a proteolytic system with surface-bound reactants.** R. W. Stephens, J. Pöllänen, H. Tapiovaara, K.-C. Leung, P.-S. Sim, E.-M. Salonen, E. Rønne, N. Behrendt, K. Danø, and A. Vaheri

1997 **Correction**

1999 **Correction**

2001 **Placement Service Notices**

Volume 108, Number 6, June 1989

2007 **Alteration by heat shock and immunological characterization of *Drosophila* small nuclear ribonucleoproteins.** L. G. Wright-Sandor, M. Reichlin, and S. L. Tobin

2017 **Multiple inducers of the *Drosophila* heat shock locus 93D (*hsrω*): inducer-specific patterns of the three transcripts.** W. G. Bendena, J. C. Garbe, K. L. Traverse, S. C. Lakhotia, and M. L. Pardue

2029 **Heat shock induces protein tyrosine phosphorylation in cultured cells.** P. A. Maher and E. B. Pasquale

2037 **Heat shock of rabbit synovial fibroblasts increases expression of mRNAs for two metalloproteinases, collagenase and stromelysin.** B. A. Vance, C. G. Kowalski, and C. E. Brinckerhoff

2045 **Unusual behavior of the cytoplasmic transcript of *hsrω*: an abundant, stress-inducible RNA that is translated but yields no detectable protein product.** M. E. Fini, W. G. Bendena, and M. L. Pardue

2059 **Yeast nuclear envelope proteins cross react with an antibody against mammalian pore complex proteins.** J. P. Aris and G. Blobel

2069 **Lamin A, lamin B, and lamin B receptor analogues in yeast.** S. D. Georgatos, I. Maroulakou, and G. Blobel

2083 **Primary structure analysis of an integral membrane glycoprotein of the nuclear pore.** R. W. Wozniak, E. Bartnik, and G. Blobel

2093 **Reconstitution of an endosome–lysosome interaction in a cell-free system.** B. M. Mullock, W. J. Branch, M. van Schaik, L. K. Gilbert, and J. P. Luzio

2101 **Secretion in yeast: preprotein binding to a membrane receptor and ATP-dependent translocation are sequential and separable events in vitro.** P. Sanz and D. I. Meyer

2107 **Mechanism of inhibition of polypeptide chain initiation in calcium-depleted Ehrlich ascites tumor cells.** R. V. Kumar, A. Wolfman, R. Panniers, and E. C. Henshaw

2117 **Interactions of misfolded influenza virus hemagglutinin with binding protein (BiP).** S. M. Hurtley, D. G. Bole, H. Hoover-Litty, A. Helenius, and C. S. Copeland

2127 **Concentration of transferrin receptor in human placental coated vesicles.** A. P. Turkewitz and S. C. Harrison

2137 **Relations between the intracellular pathways of the receptors for transferrin, asialoglycoprotein, and mannose 6-phosphate in human hepatoma cells.** W. Stoorvogel, H. J. Geuze, J. M. Griffith, A. L. Schwartz, and G. J. Strous

2149 **Isolation and characterization of membranes from bovine liver which are highly enriched in mannose 6-phosphate receptors.** D. J. Messner, G. Griffiths, and S. Kornfeld

2163 **Evidence that aggregation of mouse sperm receptors by ZP3 triggers the acrosome reaction.** L. Leyton and P. Saling

2169 **Lipid recycling between the plasma membrane and intracellular compartments: transport and metabolism of fluorescent sphingomyelin analogues in cultured fibroblasts.** M. Koval and R. E. Pagano

2183 **Transport of fluorescent phospholipid analogues from the erythrocyte membrane to the parasite in *Plasmodium falciparum*–infected cells.** K. Haldar, A. F. de Amorim, and G. A. M. Cross

2193 **Conformational change of rabbit aminopeptidase N into enterocyte plasma membrane domains analyzed by flow cytometry fluorescence energy transfer.** J.-P. Gorvel, Z. Mishal, F. Liegey, A. Rigal, and S. Maroux

2201 **Isolation of Chinese hamster ovary cell lines expressing human acyl-coenzyme A/cholesterol acyltransferase activity.** K. M. Cadigan, C. C. Y. Chang, and T.-Y. Chang

2211 **Impaired lysosomes in a temperature-sensitive mutant of Chinese hamster ovary cells.** P. A. Colbaugh, M. Stookey, and R. K. Draper

2221 **Biogenesis of peroxisomes: immunocytochemical investigation of peroxisomal membrane proteins in proliferating rat liver peroxisomes and in catalase-negative membrane loops.** E. Baumgart, A. Völkl, T. Hashimoto, and H. D. Fahimi

2233 **An investigation of mitochondrial inner membranes by rapid-freeze deep-etch techniques.** R. D. Allen, C. C. Schroeder, and A. K. Fok

2241 **The 43-kD polypeptide of heart gap junctions: immunolocalization, topology, and functional domains.** S. B. Yancey, S. A. John, R. Lal, B. J. Austin, and J.-P. Revel

2255 **The structural organization and protein composition of lens fiber junctions.** G. A. Zampighi, J. E. Hall, G. R. Ehring, and S. A. Simon

2277 **Fibroblasts transfected with *Torpedo* acetylcholine receptor β-, γ-, and δ-subunit cDNAs express functional receptors when infected with a retroviral α recombinant.** T. Claudio, H. L. Paulson, W. N. Green, A. F. Ross, D. S. Hartman, and D. Hayden

2291 **Human neuroblastoma cells acquire regulated secretory properties and different sensitivity to Ca^{2+} and α-latrotoxin after exposure to differentiating agents.** E. Sher, S. Denis-Donini, A. Zanini, C. Bisiani, and F. Clementi

2301 **Differences in structure and distribution of the molecular forms of acetylcholinesterase.** S. N. Abramson, M. H. Ellisman, T. J. Deerinck, Y. Maulet, M. K. Gentry, B. P. Doctor, and P. Taylor

2313 **Interactions of cytoplasmic granules with microtubules in human neutrophils.** S. W. Rothwell, J. Nath, and D. G. Wright

2327 **Microtubule translocation properties of intact and proteolytically digested dyneins from *Tetrahymena* cilia.** R. D. Vale and Y. Y. Toyoshima

2335 **The distribution, abundance, and subcellular localization of kinesin.** P. J. Hollenbeck

2343 **Ultrastructural visualization of cytoskeletal mRNAs and their associated proteins using double-label in situ hybridization.** R. H. Singer, G. L. Langevin, and J. B. Lawrence

2355 **Polygons and adhesion plaques and the disassembly and assembly of myofibrils in cardiac myocytes.** Z. Lin, S. Holtzer, T. Schultheiss, J. Murray, T. Masaki, D. A. Fischman, and H. Holtzer

2369 **A new 82-kD barbed end–capping protein (radixin) localized in the cell-to-cell adherens junction: purification and characterization.** S. Tsukita, Y. Hieda, and S. Tsukita

2383 **Identification of two distinct functional domains on vinculin involved in its association with focal contacts.** R. Bendori, D. Salomon, and B. Geiger

2395 **The 110-kD protein–calmodulin complex of the intestinal microvillus (brush border myosin I) is a mechanoenzyme.** M. S. Mooseker and T. R. Coleman

2401 **Novel tyrosine kinase substrates from Rous sarcoma virus–transformed cells are present in the membrane skeleton.** J. R. Glenney, Jr. and L. Zokas

2409 **Modulation of vimentin containing intermediate filament distribution and phosphorylation in living fibroblasts by the cAMP-dependent protein kinase.** N. J. C. Lamb, A. Fernandez, J. R. Feramisco, and W. J. Welch

2423 **Loss of tumorigenic potential by human lung tumor cells in the presence of antisense RNA specific to the ectopically synthesized alpha subunit of human chorionic gonadotropin.** R. T. Rivera, S. G. Pasion, D. T. W. Wong, Y. Fei, and D. K. Biswas

2435 **Dissecting tumor cell invasion: epithelial cells acquire invasive properties after the loss of uvomorulin-mediated cell–cell adhesion.** J. Behrens, M. M. Mareel, F. M. Van Roy, and W. Birchmeier

2449 **Expression of cell adhesion molecule E-cadherin in *Xenopus* embryos begins at gastrulation and predominates in the ectoderm.** Y. S. Choi and B. Gumbiner

2459 **Basic fibroblast growth factor in the chick embryo: immunolocalization to striated muscle cells and their precursors.** J. Joseph-Silverstein, S. A. Consigli, K. M. Lyser, and C. Ver Pault

2467 **Expression of fibroblast growth factor by F9 teratocarcinoma cells as a function of differentiation.** S. J. Braunhut, L. J. Gudas, T. Kurokawa, J. Sasse, and P. A. D'Amore

2477 **In vitro and in vivo association of transforming growth factor-β1 with hepatic fibrosis.** M. J. Czaja, F. R. Weiner, K. C. Flanders, M.-A. Giambrone, R. Wind, L. Biempica, and M. A. Zern

2483 **Tenascin hexabrachion in human skin: biochemical identification and localization by light and electron microscopy.** V. A. Lightner, F. Gumkowski, D. D. Bigner, and H. P. Erickson

2495 **Inhibition of proteoglycan synthesis alters extracellular matrix deposition, proliferation, and cytoskeletal organization of rat aortic smooth muscle cells in culture.** H. F. Hamati, E. L. Britton, and D. J. Carey

2507 **Laminin induces the stable expression of surface galactosyltransferase on lamellipodia of migrating cells.** D. J. Eckstein and B. D. Shur

2519 **Differential structural requirements for fibrinogen binding to platelets and to endothelial cells.** L. Tranqui, A. Andrieux, G. Hudry-Clergeon, J.-J. Ryckewaert, S. Soyez, A. Chapel, M. H. Ginsberg, E. F. Plow, and G. Marguerie

2529 **The fibronectin receptor is organized by extracellular matrix fibronectin: implications for oncogenic transformation and for cell recognition of fibronectin matrices.** J. Roman, R. M. LaChance, T. J. Broekelmann, C. J. R. Kennedy, E. A. Wayner, W. G. Carter, and J. A. McDonald

2545 **E. B. Wilson Medalist, 1988**

2547 **Correction**

2549 **Author Index for Volume 108**

2561 **Subject Index for Volume 108**
